

Aluminium Extrusion System

Service, Support, Workshop & Engineering

REFURBISHMENT & MACHINING SERVICES

Our in house workshop proudly offers a wide range of specialty services. From custom machining to assembly, service and repairs. Extensively trained and experienced tradespeople undertake all work in our fully equipped workshop.

Our services include:

- **Aluminium Profile Building Systems** cut, drilled and tapped ready for assembly
- **Ball Screws** serviced, machined and repaired
- **Design Support** by qualified engineers
- **Hardened & Ground Shafts** cut and machined to your requirements
- **Linear Modules** and Slides assembled to your needs
- **Profile Rail Guides** cut to length; machined & butt joined if required
- **Rebuild & Overhaul Facilities** for indexing boxes & industrial brake & clutch components

WORKSHOP FACILITIES

Our fully equipped workshop allows us to machine, service and repair our product range.

ENGINEERING SUPPORT

Our entire product range is supported by qualified and experienced engineers.

Aluminium Extrusion System

SES PROFILE SOLUTION SYSTEM

SES Linear Bearings, as part of the SES Group, has been providing cost effective engineering solutions to the Australian and New Zealand industrial market for over 50 years.

We have over 300 staff located throughout Australia and New Zealand, our priority being customer satisfaction by delivering innovation and design to mechanical solutions.

SES Profile Solution System, combined together, can provide engineered solutions for:

- Guards
- Workstations
- Material Handling
- XYZ Machines
- Lifting Equipment,

and every possible mechanical design application that requires flexibility of design as well as functionality and style.

SES Linear Bearings and the SES Group of companies, using the Bosch profile building system and the SES Profile Solution System, features:

- largest product range of any solution provider
- world leading Scratch Resistant Anodising
- high tolerance for superior precision
- compatibility with all other profile manufactures
- several design programs available for all drafting programs.
- bulk supply, flat packs, designed, built then delivered or fully installed systems
- modular systems, compatible designs ... and:
- is easy to assemble and modify
- requires no special tools
- is light and strong

Available to our design engineers to assist in providing solutions are:

- Profiles
- Fittings
- Fasteners
- Panel Material
- Mesh Panels
- Adjustable Feet
- Dynamic Elements
- Casters
- Modules
- Gearbox and Drive Components
- Linear Rail
- Actuators
- Ball Screw
- Rack and Pinion
- Servo Drive Units
- Control Systems
- Stepper Motors

Whether you: purchase parts, ask us to machine parts to your design, have our engineers assist you in your design or design a solution for you, have us build the solution, and even install the solution to your site—full service and support is the SES Group's aim for every product we supply.
