SES LUBRICATION DIVISION

Established nationally within the SES group and offering a full service of lubrication solutions with 30 years of experience to our network of customers in Mining (surface and underground), Power Generation, Industrial, Agricultural and Food Manufacturing. With the support of the Major suppliers of Equipment and Lubricants the SES Lubrication Division can offer solutions from as small as Oil Sampling and Testing to fully designed, integrated and installed lubrication outcomes.

Comprising of three segments the SES Lubrication division is able to provide the widest range of Lubrication alternatives.

- Our service department can provide onsite technical advice, repair and installation
- Our range of Lubricants enable us to offer our customer the correct lubricant for the customer's specific needs and requirements
- The wide range of Lubrication equipment that the SES Lubrication Division has access to and in some applications exclusively, make it possible finding solutions to the most difficult problems.

EQUIPMENT

Through established strategic alliances with the key recognisable suppliers in the market the SES Lubrication Division is at the forefront of technology and range. From simple applications such as grease guns, fuel dispensing nozzle and units, pressure hoses and reels to the far more advanced lubrication systems for drag lines, bucket loaders, steel rope lubricators and underground conveying systems such as;

- Fire suppression systems
- Single point and multi-point lubrication system
- Centralised lubrication system for heavy industrial vehicles, mobile equipment
- Surface and Underground Lubrication Service Bay's
- Fixed plant centralized lubrication systems

LUBRICANTS

As with all other divisions of the group the SES Lubrication Division only works with and maintains relationships with the market leading companies and brands. This is why we are able to provide the customer the best possible solutions with the highest quality products and just as importantly at the best value pricing.

Due to our corporate size we are able to negotiate and access product

both nationally and internationally to ensure that our customer maintain the best possible technical advantage while striving for a lower cost of doing business. Some of the brands that we offer are;

- BP/Castrol
- Lanotec
- ITW Polymers & Fluids (Molybond and Rocol)

SERVICE

Our SES Lubrication Mobile Service Units offer "one stop shop" solutions on site at a time to suit production needs. With the ability to offer simple oil testing, condition monitoring analysis, lubrication site audits and broadening into service, repairs and ongoing maintenance plans.

Through our experienced Technical

Team we can provide solutions to ongoing lubrication problems that may reduce capital expenditure and production down time.

We can analysis, design, construct and onsite install comprehensive lubrications systems with programmed monitoring service, including remotely, and the complete repair of these systems.

Service, Support, Workshop & Engineering

SERVICE SUPPORT & ENGINEERING

Our in house workshop proudly offers a wide range of specialty services, from custom machining to assembly, service and repairs. Extensively trained and experienced tradespeople undertake all work in our fully equipped workshops.

Our services include;

- Lubrication Training
- Lubrication Management
- Technical Support
- Extensive experience within the industrial, mining, metal working and power generation industries
- Field service work (gear box oil change outs, Weekly greasing, general lubrication maintenance)
- Site lubrication system auditing
- Scheduled programmed maintenance
- Defect management
- Lubrication system pump repairs
- Condition Monitoring (oil analysis, gear box breathers etc)
- Oil Purification

WORKSHOP FACILITIES

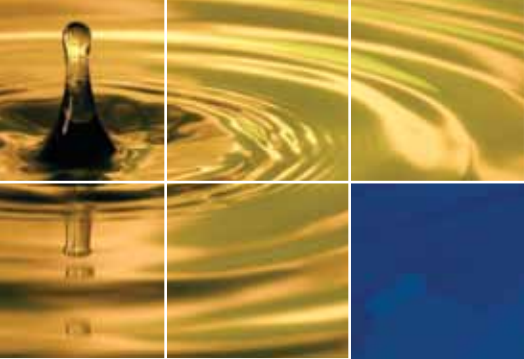

Our fully equipped workshop allows us to machine, service and repair our product range.

ENGINEERING SUPPORT

Our entire product range is supported by qualified and experienced engineers.
